

Students:
**Learn about the exciting careers
in the semiconductor industry**

Experience this conference for free with a
Student Grant

Network. Learn. Grow your career.

It's global.

The conference attendance,
like the industry, is worldwide.

65%
North
America

14%
Europe

19%
Asia

**SPIE Advanced Lithography
+ Patterning** is the global
conference for emerging
technology in the semiconductor
industry, showcasing:

- Optical and EUV lithography
- Patterning technologies
- Metrology
- Process integration for
semiconductor manufacturing
and adjacent applications
